

Solenoid Option for BA Series Valve

CROSS is pleased to announce the addition of a solenoid option for the 30 Gallon 3000 psi Series BA valve. Available in 12 or 24 volts DC, or 120 or 240 volts AC, this feature offers the convenience and remote control capabilities of electrical operation with the load check advantages of the BA Valve for lifting applications. Integral internal drains eliminate the need for external plumbing. The versatile BA valve is available in a single, double, or triple spool model with power beyond option as well as a variety of spool and actuator choices.

Standard Valves — 4 way, 3 position open center (tandem), 12 volt solenoid, 2000 psi adjustable relief, with end outlet and 1V3636 check plug in power beyond, SAE ports — 1 1/16-12 in and out & 3/4-16 work

Single spool	SBS2	132040	BA11HG6EC4	\$540.79
Double spool	SBS22	137020	BA211HHG6EC4	\$913.28
Triple spool	SBS222	146505	BA3111HHHG6EC4	\$1,320.24

These standard valves will carry the maximum distributor discount regardless of quantity and will be included in our Full Line catalog.

Ordering Notes: Nomenclature will be similar to the BA valve.

- For actuator options use "H" for 12 volt, "J" for 24 volt, "K" for 120 volt, and "L" for 240 volt.
- Specify #6 for the 1V3636 check valve in the power beyond machining (unless you are specifying a power beyond sleeve or closed center plug).
- A #4 designation for the handle option will indicate "no handle" for those spools where a solenoid option has been specified.
